# Electronic lock SELO-B

## Lock settings to be effected by the administrator

### General lock settings (valid for all users)

**Setting the clock**

| Date | day / month / year |

| Time | hours / minutes can be set to automatic change-over from summer to winter time |

| Select length of numerical code | 7 or 8 digits |

**Setting the time functions**

| Opening delay | between 0 and 99 minutes |

| Access timer A | up to 8 time windows, linked to particular week days, to be repeated on a weekly basis |

| Access timer B | up to 8 time windows, linked to particular week days, to be repeated on a weekly basis |

| Blocked calendar | up to 13 one-time holidays and up to 7 permanent holidays (also periods of more than one day) |

| Reset of all time functions | deletion of all blocked time settings |

| Code change blocked for all users | to stop users changing a code setting effected by the administrator |

**Mode change**

| Professional mode | all functions available (factory setting) |

| Lite mode | only simple basic functions are available |

### Individual lock settings (users 1 through 39)

**Enter new user**

| User name | up to 16 characters |

| working under opening delay | user is under control of the opening delay or he can unlock undelayed |

| User's access authorisation level | 1 = access authorisation alone<br>1/2 = access only allowed together with a further person<br>1/3 = access only allowed together with two further persons<br>0 = user's right to open lock temporarily suspended<br>ADMI = user has co-administrator rights |

| Code input | user's personal numerical code |

| Monitoring by means of an access timer | A = settings of timer A<br>B = settings of timer B<br>- = lock operation not blocked by a timer |

**Input/change user settings**

| User name |

| working under opening delay |

| User's access authorisation level |

| Code input |

| Monitoring by means of an access timer |

| Delete user | complete removal of a user without knowing user's valid numerical code |
