

Opening by code or fingerprint is possible with our premium electronics
Secu SELO - B V.2 FP possible. Individual opening rights and manipulation protection through paired encryption are further advantages for your security.

Secu SELO - B V.2 FP

Graphic display

Optimum operability thanks to the tilting position: all functions and settings can be used even more easily via the high-contrast graphic display.

Touch control panel

Simply swipe across the control panel and the modern safe electronics are activated. Plus: two-colour lighting for even more comfort!

Fingerprint modules

The premium electronics stores up to 20 fingerprints and also up to 10 codes with individual opening authorisations.

Secu SELO - B V.2 FP

The fingerprint electronics for our locks combine modern design with innovative technology and a high level of operating comfort based on intuitive menu navigation. The illuminated touch control panel can be activated simply by touch. If a new software version is available, you can easily transfer it via microSD card. So your model is always up to date!

New electronics with illuminated touch control panel, graphic display and fingerprint sensor

- ECB-S certified safe lock with fingerprint module EN 1300 class B
- Programmable electronic combination lock
- 1,000,000 Setting options
- One Admin code and up to 49 User codes and up to 20 fingerprints can be programmed
- The fingerprint sensor has a „Fake Finger Detection“ - this live finger detection excludes fake fingers during identification
- Modern and precise state of technology authentication process
- **Security plus:** opening delay, locking times (5 minutes after 3 incorrect code entries, then 10 minutes each time), firmware updates via microSD card
- Locking history can be read out on the graphic display; number of histories: 2,000
- Input unit and lock module are paired in encrypted form to ensure optimum protection in case of manipulation

By entering a code, our premium electronics **Secu SELO - B V.2** is opened. The electronics offer you protection against manipulation and provide greater security thanks to the automatic opening lockout time from three incorrect code entries.

Secu SELO - B V.2

Graphic display

Optimum operability thanks to the tilting position: all functions and settings can be used even more easily via the high-contrast graphic display.

Touch control panel

Simply swipe across the control panel and the modern safe electronics are activated.

Secu SELO - B V.2

The standard electronics also offer a graphic display and touch control panel for optimum top view. The menu navigation is also intuitive, as with the fingerprint electronics. However, fewer features and settings are available. For example, opening by fingerprint is obsolete, and in the Secu SELO B V.2 FP electronics, only 10 codes can be assigned instead of 50. Software updates and opening delays are also eliminated.

New electronics with touch control panel and graphic display

- ECB-S-certified, class B
- 1,000,000 Setting options
- One programmable Admin code and up to nine programmable User codes
- Incl. four batteries Mignon LR 06 AA
- Blocking times from three incorrect code entries (after three incorrect code entries 5 minutes, then 10 minutes each time)
- Locking history can be read out on the graphic display; number of histories: 500
- Input unit and lock module are paired in encrypted form to ensure optimum protection in case of manipulation

SECU Sicherheitsprodukte GmbH

Manufacturer of high security closure systems with product certifications from ESSA (ECB-S) and VdS. Supply of safe lock technology and safe components to safe manufacturers all over the world.
