

By entering a code, our premium electronics **SECU SELO - B V.2** is opened. The electronics offer you protection against manipulation and provide greater security thanks to the automatic opening lockout time from three incorrect code entries.

SECU SELO - B V.2

Graphic display

Optimum operability thanks to the tilting position: all functions and settings can be used even more easily via the high-contrast graphic display.

Touch control panel

Simply touch the On button and the modern safe electronics are activated.

SECU SELO - B V.2

The standard electronics offer a touch control panel and graphic display for optimum top view. The menu navigation is also intuitive. This lock type provides basis functions. However, if additional functions are needed, the premium lock SELO-B V.2 FP should be used.

New electronics with touch control panel and graphic display

- ECB-S-certified, class B
- 10,000,000 Setting options
- One programmable Admin code and up to nine programmable User codes
- Incl. four batteries Mignon LR 06 AA
- Blocking times from three incorrect code entries (after three incorrect code entries 5 minutes, then 10 minutes each time)
- Locking history can be read out on the graphic display; number of histories: 500
- Input unit and lock module are paired and the data communication is secured by an Advanced Encryption Standard (AES) to ensure optimum protection in case of manipulation
- Optional: preparation alarm box and alarm box: silent alarm and remote blocking
